

## Plop-Plop, Fizz-Fizz

Thursday, 25 February 2010 14:20

---

Liberal High School students Bryan Murillo, left, Ivan Gaytancuella and Miguel Navarette prepare their contest entry during Wednesday's competitions at the USD 480 Science Fair in the Seward County Ag Building. Their machine has to perform six objectives in a certain amount of time. The catalyst for initiating the device is using pressure from either mixtures of vinegar and baking soda or water and Alka Seltzer. Daily Leader photo/Larry Phillips
