Show off that antique tractor during the Seward County 5-Spot Fair.

### Routine blood test saved baby's life

#### MCADD a silent killer for many

**A** 14-month-old boy, who looks like the healthy, chubby baby he is, has a secret. His parents, Colleen and Morgan, know that only hours after his birth, he was a typical orange from death.

Colleen and Morgan know that their son, Luca, was born with a rare genetic condition called medium-chain acyl-CoA dehydrogenase deficiency (MCADD). It is a rare, inherited metabolic disorder that can be fatal if not diagnosed and treated early.

Luca's parents, Colleen and Morgan, were told that Luca had MCADD when he was just a few days old. They were told that Luca would need to be on a special diet for the rest of his life. They were told that Luca would need to be on a special diet for the rest of his life.

Luca's parents, Colleen and Morgan, were told that Luca had MCADD when he was just a few days old. They were told that Luca would need to be on a special diet for the rest of his life. They were told that Luca would need to be on a special diet for the rest of his life.

Luca's first year, as he learned to walk, Luca's parents, Colleen and Morgan, know that only hours after his birth, he was a typical orange from death.
