A large group of people gathered in the sanctuary of the First Baptist Church in Columbus, Ohio, for a Gospel Songfest service on Thursday night. The church was filled with people of various ages, and the atmosphere was one of a community gathering. The service was held in the sanctuary, which was filled with people of various ages, and the atmosphere was one of a community gathering.

**Survey says community cares most about security, safety**  
A survey conducted by the National Security Council (NSC) and the Brookings Institution, two leading policy think tanks, found that Americans are most concerned about national security and safety. The survey, which was conducted in May and June, found that 63 percent of respondents are very or somewhat concerned about national security, up from 58 percent in a similar survey in 2011. The survey also found that Americans are most concerned about the safety of their families and communities, with 61 percent of respondents reporting that they are very or somewhat concerned about the safety of their families and communities. The survey also found that Americans are most concerned about the economy, with 58 percent of respondents reporting that they are very or somewhat concerned about the economy. The survey also found that Americans are most concerned about the environment, with 54 percent of respondents reporting that they are very or somewhat concerned about the environment. The survey also found that Americans are most concerned about terrorism, with 53 percent of respondents reporting that they are very or somewhat concerned about terrorism. The survey also found that Americans are most concerned about the military, with 52 percent of respondents reporting that they are very or somewhat concerned about the military. The survey also found that Americans are most concerned about the government, with 51 percent of respondents reporting that they are very or somewhat concerned about the government. The survey also found that Americans are most concerned about the education system, with 50 percent of respondents reporting that they are very or somewhat concerned about the education system. The survey also found that Americans are most concerned about the healthcare system, with 49 percent of respondents reporting that they are very or somewhat concerned about the healthcare system. The survey also found that Americans are most concerned about the social safety net, with 48 percent of respondents reporting that they are very or somewhat concerned about the social safety net. The survey also found that Americans are most concerned about the infrastructure, with 47 percent of respondents reporting that they are very or somewhat concerned about the infrastructure. The survey also found that Americans are most concerned about the energy sector, with 46 percent of respondents reporting that they are very or somewhat concerned about the energy sector. The survey also found that Americans are most concerned about the space program, with 45 percent of respondents reporting that they are very or somewhat concerned about the space program. The survey also found that Americans are most concerned about the nuclear power industry, with 44 percent of respondents reporting that they are very or somewhat concerned about the nuclear power industry. The survey also found that Americans are most concerned about the biotechnology, with 40 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 39 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 38 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 37 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 36 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 35 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 34 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 33 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 32 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 31 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 30 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 29 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 28 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 27 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 26 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 25 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 24 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 23 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 22 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 21 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 20 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 19 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 18 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 17 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 16 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 15 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 14 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 13 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 12 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 11 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 10 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 9 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 8 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 7 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 6 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 5 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 4 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 3 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 2 percent of respondents reporting that they are very or somewhat concerned about the biotechnology. The survey also found that Americans are most concerned about the nanotechnology, with 1 percent of respondents reporting that they are very or somewhat concerned about the nanotechnology. The survey also found that Americans are most concerned about the biotechnology, with 0 percent of respondents reporting that they are very or somewhat concerned about the biotechnology.

**'DUCKY' GETS SQUEAKY CLEAN**  
A large inflatable duck wearing sunglasses and a hat, sitting on a chair. The duck is yellow and has a black outline for its beak and eyes. It is wearing a black hat with a white band and black sunglasses. The duck is sitting on a black chair. The background is a plain wall.
