**Illini grad talks to students from space station**  
ILLINOIS, (UPI) — A former astronaut who spent time in space last year is talking to students from the University of Illinois at Urbana-Champaign about his experience. The former astronaut, Gregory B. Bressi, is a graduate of the university and is currently a professor of aerospace engineering. He is also a member of the university's space station team. Bressi is currently on the International Space Station, where he is conducting research on the effects of microgravity on the human body. He is also participating in a series of experiments that will help scientists understand the effects of space on the human body. Bressi is currently on the International Space Station, where he is conducting research on the effects of microgravity on the human body. He is also participating in a series of experiments that will help scientists understand the effects of space on the human body.
