Oklahoma City resident celebrates 113th birthday

She's 113 and still as spry as a daisy. In fact, she's so spry that she's still working as a secretary at the Oklahoma City office of the U.S. Postal Service. She's 113, and she's still going strong. Her name is Edna Mae Smith, and she was born on Jan. 1, 1901, in the town of Okfuskee, Okla. She's the youngest of six children of a farmer and a school teacher. She's been married to her husband, Fred, for 60 years. They have six children and 12 grandchildren. She's still living in her home in Oklahoma City, and she's still working as a secretary at the U.S. Postal Service. She's still as spry as a daisy.

Home electricity use in US falling to 2001 levels

WASHINGTON — The amount of electricity used in U.S. homes is falling to levels not seen since 2001, according to a report from the U.S. Energy Information Administration. The report says that home electricity use in the U.S. fell 1.5 percent in the third quarter of 2013 compared with the same quarter in 2012. This is the first time since 2001 that home electricity use in the U.S. has fallen. The report also says that home electricity use in the U.S. is expected to continue to fall in 2014. This is due to a number of factors, including the fact that many Americans are switching to energy-efficient light bulbs and appliances, and that many Americans are working from home, which reduces the need for office space and electricity.

BETTER GADGETS
The iPhone 5s is the latest addition to Apple's line of smartphones. It features a new design, a faster processor, and improved camera capabilities. The iPhone 5s is available in gold, silver, and space gray. It starts at \$149. The iPhone 5c is also available, featuring a colorful plastic case. It starts at \$99.
