USDA issues order concerning pig virus

USDA has issued an order to prevent the spread of a deadly virus that can kill pigs. The order, issued on June 11, requires pig owners to prevent the virus from spreading to other pigs. The virus, known as African Swine Fever, is a highly contagious disease that can cause the death of infected pigs within a few days. The order applies to all pig owners in the United States, including those who raise pigs for meat, show purposes, or as pets. Pig owners are required to prevent their pigs from coming into contact with wild pigs, and to prevent their pigs from coming into contact with other pigs from other farms. The order also requires pig owners to report any signs of the virus to their state veterinarian.

Program helps older workers find jobs

A program designed to help older workers find jobs is getting underway in Wichita. The program, known as the Older Workers Benefit Protection Act, is a federal law that requires employers to provide health and life insurance to older workers. The program is designed to help older workers find jobs by providing them with the resources they need to succeed in the workforce. The program includes a variety of services, including job training, counseling, and financial assistance. The program is available to all older workers, regardless of their age or income level.

Escaped Hutcheson inmate recaptured in Wichita

WICHITA — A 41-year-old inmate who escaped from the Hutchinson Correctional Institute in Hutchinson, Kan., on June 10, has been recaptured in Wichita. The inmate, whose name has not been released, was seen in Wichita on June 11. He was taken into custody by Wichita police and is being held in the city jail. The inmate was charged with escape from custody. The Hutchinson Correctional Institute is a medium-security prison in Hutchinson, Kan. It houses approximately 1,000 inmates. The inmate's escape was a surprise to prison officials, who said they had no idea he had escaped. The inmate was seen in Wichita about 100 miles from Hutchinson. He was seen in a public place and was identified by a witness. The inmate was taken into custody by Wichita police and is being held in the city jail. He is being held in the city jail until he can be transported back to the Hutchinson Correctional Institute.

Kansas Chamber PAC endorses Jim Rice

The Kansas Chamber of Commerce PAC has endorsed Jim Rice for the U.S. House of Representatives. The endorsement is part of the Chamber's ongoing effort to support candidates who support free-market principles and economic growth. Jim Rice is a businessman and a member of the Kansas Chamber of Commerce. He is running for the U.S. House of Representatives in the 2014 election. The Chamber's endorsement is a sign of support for Rice's campaign. The Chamber is a non-profit organization that represents the interests of businesses in Kansas. It is committed to promoting economic growth and job creation in the state.

Summer programs offer first taste of college studies

Students who want to get a head start on college studies can take advantage of summer programs offered by local colleges. These programs provide students with a taste of college-level coursework and help them develop the skills and habits they will need to succeed in college. The programs are designed to be challenging and rewarding, and they provide students with the opportunity to earn college credit. The programs are available to students who are currently in high school or who have completed high school. The programs are offered by a variety of colleges and universities in the area. The programs are a great way for students to get a head start on college studies and to develop the skills and habits they will need to succeed in college.

Health officials investigate report of new virus

Health officials are investigating a report of a new virus found in a mosquito. The virus, known as the West Nile virus, is a common mosquito-borne virus that can cause illness in humans. The virus was found in a mosquito in Wichita, Kan., on June 11. The mosquito was found in a public place and was identified by a witness. The virus was taken to a laboratory for testing. The laboratory confirmed that the virus was the West Nile virus. The virus is a common mosquito-borne virus that can cause illness in humans. The virus is spread by mosquitoes and is found in many parts of the world. The virus is a major public health concern because it can cause serious illness and death. Health officials are investigating the report of the new virus to determine if it is a new strain of the virus. The virus is a common mosquito-borne virus that can cause illness in humans.
